

Call for Abstract:

JBR society planning committee welcomes your abstracts for Conference Paper Publication.

All submissions should be made online. Please submit your abstract by given email.

Abstract template:

Title of Conference: 12th World Dental Science & Oral Health Conference & Expo Conference

Title: Saliva Diagnostic Technologies: The Next Frontier in Cancer Diagnostics?

Jacek Chmielewski, MS

Researcher, Saliva Diagnosis, JBR Health Education and Research, USA

Email: jackchemj@jbrher.com

Early cancer detection is not only critical to decrease cancer brutality and prevent complications, but also significant to increase success rate of treatment and management. Saliva provides a noninvasive, ease of use and cost effective as well as alternative to blood draws, serum and urine, with testing possibility done at the point of care and smart technologies. Different molecules have been isolated in saliva known as cancer biomarkers for diagnosis, prognosis, drug monitoring and pharmacogenetic studies. In this keynote, I will focus on the current status of the salivary diagnostic biomarkers based on JBR Studies for early detection and monitoring different cancers as well as their potential use in the clinic and their applicability in personalizing cancer therapies.

Biography

Jacek Chmielewski (Jack) is Student president and Researcher of the Institute of Health Education Research and Technology. Jack has multiple published articles in international and national journals and has written books.
